PROFESSIONAL EXPERIENCE

 React.js front-end developer and software Engineer , making Ai-powered interactive applications with attractive UI MERN Stack Developer seeking job or internship opportunities to leverage expertise in React.js, Tailwind Css, still studying Node,js as back-end and MongoDB while delivering innovative, scalable web solutions

PROFESSIONAL EXPERIENCE

HIMIT, Problem Solving Community –Kfs, Egypt
- Developed and delivered course materials for problem-solving and programming courses, focusing on algorithms and data structures.
- Taught 20+ students through theoretical lectures and hands-on coding sessions, improving their problem-solving skills by 30% on average.
- Guided students in applying efficient solutions to real-world programming challenges using C++ and Python.

Competitive Programming Contestant
- Competed in regional ICPC and ACPC contests, solving 50+ algorithmic problems under time constraints.
- Collaborated with a team of 3 to design and implement optimized solutions, enhancing teamwork and coding efficiency.
- Strengthened proficiency in C++, algorithms, and performance analysis.

HR Recruiter & Marketing Team – Talent Hub

- Posted job listings for roles like Customer Service on social media, boosting applicant reach by 25%.
- Managed data for applicants using Excel, ensuring accurate tracking and timely follow-ups.
- Designed job posters with themes for brand consistency.
- Created a recruitment process presentation, clarifying stages for team training.

React-front-end Developer
- Junior and still looking for Job

EDUCATION

Higher Institute Of Engineering And Technology   **Kafr El-Sheikh, Egypt**
Bachelor of Computer Science
 Awards: 3.7 GPA (TOP 10%)   **2023-Present**

SKILLS

Technical Skills
★ **Front-End**: React.js, Tailwind CSS, React Router, Vite, JavaScript, HTML, CSS, RESTful APIs ,AI-Powered
★ **Programming Languages**: C++, Python, C#, Algorithms, Data Structures ,Problem Solving
★ **Database:** MySQL, SQL
★ **Back-End**: Node.js (Still Exploring), Express.js (Still Exploring)
★ **Tools:** Git, GitHub, AI Integration

Soft Skills
• **Problem Solving**: Excelled in competitive programming, solving 50+ algorithmic challenges with optimized solutions
• **Teamwork:** Collaborated effectively in ICPC/ACPC contests and team projects, enhancing group efficiency

• **Communication**: Delivered engaging lectures to 20+ students, improving their programming skills by 30%
• **Adaptability:** Quickly learned and applied new technologies like Vite, Tailwind CSS, and AI APIs in projects
• **Time Management:** Balanced academic excellence (3.7 GPA, top 10%) with competitive programming and teaching

PROJECTS

AI-Powered React Recipe Generator

- Built a full-stack React.js application, generating unique recipes based on user-inputted ingredients.
- Integrated AI-driven APIs to provide tailored recipe suggestions, reducing response time by 15% through optimized Node.js logic.
- Designed a responsive, modern UI using CSS and React.js, managing state with hooks for seamless user interaction.
- Deployed using Git/GitHub for version control: github.com/codestcode/recipe-generator.

"Sycnfocus" - Ai-Powered Smart Habit Tracker And Dashboard

- Developed a productivity app using React 19, Tailwind CSS, and Vite, featuring a Smart Dashboard, Study Tracker, and Expense Tracker for enhanced user productivity.
- Integrated Firebase for real-time syncing and user authentication, and Recharts for visualizing study hours and expense data, improving user engagement.
- Implemented AI-powered suggestions to deliver personalized productivity tips, optimizing performance with localStorage for offline data persistence.
- Deployed via GitHub for version control: github.com/codestcode/syncfocus.
